Produce - Lettuce supplies are adequate which is helping pressure lettuce prices lower. Iceberg lettuce shipments last week did decline 3% from the previous week, but were still 2% better than last year. History suggests that the downside potential in lettuce prices from here may only be modest, however. The five-year average move for the iceberg lettuce market during the next four weeks is an increase of 33%. Tomato prices have been on the rise during the last week but history signals that the markets may remain range-bound during the next month.
