RECIPE BOOK CREATION

Keep your kitchen running smoothly.

Printed detailed recipes for each menu item, including ingredients and production procedures.

A book containing recipes for all the items prepared in a restaurant is a critical resource for employees in a restaurant. Cooks need a reference tool to know if they are making the item correctly. Front-of-house employees need a source of information to answer questions from customers or to avoid potential allergic reactions.

Our specialists can work with your team to create the recipes, type them out to include all the pertinent information – recipe name, ingredients with exact amounts, preparation instructions, serving size, preparation time, equipment needed, cost, presentation instructions, even a photograph of the item if one is provided – print them and organize them in a 3 ring binder with page protectors for your team to reference.
